Electronics technician for energy and building technology (m/f/d)

Briefly about us:
We are IMS Kommunikationstechnik GmbH – based in Leipzig. We are a manufacturer-independent provider of services for operators of public and private communication
and private communications networks with many years of experience. For our customers we plan,
and maintain modern infrastructure and system technology components in the areas of telecommunications
telecommunications, building services and energy technology.

What is the job about?

You are the electrical specialist in the team who connects, tests and approves installations.

Your future area of responsibility:

- You will set up and install electrical systems and get them up and running at our
  radio sites up and running
- You install new meter points
- You are also responsible for the connections to lightning protection and earthing systems
- You will test electrical systems and create protocols in accordance with DIN VDE
- You carry out the acceptance of installations, measure whether the connection is
  and record everything in writing
- You also take care of paperwork: going through plans, filing photos and data file photos and data, fill in simple tables.

What you bring with you:

- Completed vocational training as an electronics technician for energy and building
  building services engineering, electrician or comparable training
- Professional experience in the field of energy and building services engineering
  wish for
- You have the desire to develop yourself further – e.g. through specialised further training
- You are able to organise your own time and your working day
  organise your working day
- Working at height is not a problem for you, after all you enjoy
  the view
- You should be able to work with a computer
- Class B driving licence (you travel a lot)
